

## **CompuMed Signs Contract with Veritas Collaborative To Screen for Cardiac Conditions in Patients with Eating Disorders**

LOS ANGELES – September 10, 2012 -- CompuMed, Inc. (OTCBB: CMPD) ([www.compumed.net](http://www.compumed.net)) -- a leader in telemedicine services for patient diagnosis and management -- has signed a contract with Veritas Collaborative ([www.veritascollaborative.com](http://www.veritascollaborative.com)), a specialty behavioral health hospital for young people with eating disorders. CompuMed will provide CardioGram(TM) electrocardiogram (ECG) remote over-read services to patients who may have pre-existing cardiac disorders or those who may develop cardiac problems due to anorexia and other related conditions.

Maurizio Vecchione, CompuMed's CEO, made the announcement saying, "We understand the difficulty in treating eating disorders as Veritas patients may also have other underlying conditions such as cardiac problems. It is not uncommon to find bradycardia indicating electrical problems in the heart, as well as ECG findings of low voltage or prolonged QT interval, all relating to a possible eating disorder." He added that in anorexia, cardiac insufficiency is a major concern because as the heart loses contractility and mass, patients can be at risk of heart failure.

Veritas Collaborative Medical Director Dr. Ana Carla Smith will rely on CompuMed to provide ECG testing to those patients with cardiac risk factors and for general screening. "CompuMed is helping us to provide our patients with the highest level of cardiac care using the most accurate cardiac assessment."

The CardioGram system reduces healthcare costs significantly by providing remote cardiac screening at the point-of-care and reducing unnecessary transports to emergency rooms. However, the most unique and life-saving feature of the CardioGram is the device's over-read capabilities or "The Doctor Inside™," which immediately engages one of CompuMed's on-call cardiologists to over-read the computerized interpretation. Cardiologist over-reads can be made available to attending physicians at the point-of-care providing expert interpretations in those situations where the data is ambiguous or difficult to interpret. "The Doctor Inside" is a key element of CompuMed's unique approach to telemedicine and telecardiology.

For more information, contact CompuMed at 310- 258-5000 or sales at (310) 258-5033.

### **About CompuMed**

CompuMed's diagnostic and management tools for the healthcare community focus on telecardiology systems and software solutions. We offer analysis and remote monitoring for patients with cardiovascular and musculoskeletal diseases designed to improve healthcare provider workflow and patient care while reducing costs.
