

## **CompuMed to Provide CardioGramKids and CompuBridge e-Health Services to Operation Samahan Community Clinics and School Health Centers**

LOS ANGELES, Oct 28, 2010 -- CompuMed, Inc. (NASDAQ OTC: CMPD) (<http://www.compumed.net>), a telemedicine and medical informatics company, has entered into an agreement with Operation Samahan (<http://www.operationsamahan.org>) to provide CompuMed's CardioGramKids® electrocardiogram (ECG) telemedicine and CompuBridge™ electronic health record (EHR) services system wide to Operation Samahan's five community clinics and school health centers.

Operation Samahan operates one of the nation's leading community clinic organizations, providing San Diego County residents with nearly 50,000 patient visits per year at five community clinics and school health centers.

CompuMed's CardioGramKids Pediatric Screening Program provides ECG screening services to children and teenagers prior to taking psychotropic medications or participating in school or afterschool sports programs. CompuMed's CompuBridge service enables real-time integration of ECG and other data into a wide variety of EHR systems.

"We are very excited to partner with Operation Samahan to enhance the delivery of preventive medicine in San Diego County," said CEO Maurizio Vecchione. "With the extension of our school health center program into community clinics and our integration of ECG and EHR technologies, CompuMed remains at the forefront of ECG telemedicine. We are also well positioned to assist healthcare providers everywhere in making meaningful use of electronic health records technology in a way that is at once powerful and practical," Mr. Vecchione added.

CompuMed will provide Operation Samahan with the company's CardioGramKids ECG equipment and with over-reads performed remotely by CompuMed's pediatric cardiologists. CompuMed will also work with Operation Samahan to enable real-time integration of ECG results into their system wide EHR programs. ECG data combined with other personal diagnostic or treatment data in EHR systems can help alert physicians to a variety of significant health issues, including the cardiac impact of prescribed medications and other treatment regimens.

"We are very grateful to CompuMed for enabling us to provide our community clinic patients and local school children with state of the art ECG and EHR services that are both convenient and affordable," said Joel San Juan, CEO and Executive Director of Operation Samahan.

"The ability to access pediatric cardiologist overreads and integrate ECG and EHR data in such a practical manner greatly increases the range and scope of what we are able to provide here at the clinical level," said Samahan Medical Director Maria T. Villa, M.D. "Our system wide deployment of CompuMed technology has the potential to result in a significant long-term reduction of morbidity and mortality associated with previously unrecognized cardiac conditions in our county's youth, particularly among the population we serve who may formerly have had limited access to such sophisticated services," added Dr. Villa.
