

CompuMed, Inc. Offers the INTEL[®] HEALTH GUIDE as Part of Its Integrated Telecardiology Services Company Offers INTEL[®] HEALTH GUIDE Pursuant to Agreement with Intel-GE Care Innovations[™], LLC

Los Angeles – March 21, 2011 – CompuMed, Inc. (OTCQB: CMPD)(<http://www.compumed.net>), a **telemedicine** and medical informatics company providing telecardiology services and products for the clinical sector, announced that it has begun offering the INTEL[®] HEALTH GUIDE as part of its integrated telecardiology products and services pursuant to an agreement signed today between the Company and Intel-GE Care Innovations, LLC (Care Innovations).

The INTEL[®] HEALTH GUIDE from Care Innovations is a product (hardware and software) that offers a comprehensive solution for virtual care, enabling daily monitoring of patient health conditions and information exchange via video conferencing. The INTEL[®] HEALTH GUIDE provides a large touch screen and simple software user interface. The system obtains information (automatically if connected) from specific peripherals monitoring vital signs (e.g., blood pressure, weight, blood glucose, pulse oximetry and peak flow), as well as from questionnaires provided to the patient. CompuMed has developed a series of customized cardiovascular care protocols for use by its customers using the INTEL[®] HEALTH GUIDE.

Maurizio Vecchione, CompuMed's President and CEO said, "We have been working hard to extend CompuMed's capability into the disease management arena. Our belief is that our customers need not only diagnostic and over-read capabilities but also access to technologies that manage patients long term." He added, "With the introduction of the INTEL[®] HEALTH GUIDE into our product mix, we have added an important capability to our product line expansion for the Company. We are pleased to be aligned with a leader in telemedicine such as Care Innovations and believe that pursuant to our agreement, we can innovate and iterate our product line quickly as a result of working together."

Dr. David Frisch, MD, F.A.A.C, and CompuMed's Medical Director added, "Our monitoring protocols are targeted at cardiovascular patients with intensive needs. By combining those protocols with our existing diagnostic telecardiology, we can extend the type and scope of our services that our physicians are able to offer. We can now

expand significantly into disease management, and we expect this to have impact throughout our clinical settings.”

About CompuMed

CompuMed, Inc. (OTCQB: CMPD) develops and markets products and services that combine advanced imaging with medical informatics. Its focus is on analysis and remote monitoring for patients with cardiovascular and musculoskeletal diseases. The company has specialized expertise and intellectual property in telemonitoring imaging and analysis designed to improve healthcare provider workflow and patient care while reducing costs. CompuMed is headquartered in Los Angeles and distributes its products worldwide both directly and through OEM partners.
