

**CompuMed, Inc. and Jessica Clinton MVP Foundation Team Up for "Know Your Heart" Student Cardiac Screening Days**

***Event at St. Lucie West Centennial High School Offers ECG Screenings  
September 9-10***

**Los Angeles – Sept 8th, 2011 – CompuMed, Inc.** (PINK:CMPD - [www.compumed.net](http://www.compumed.net)), a telemedicine and medical informatics company, is working with the Jessica Clinton MVP Foundation to provide electrocardiogram (ECG) screenings with telemedicine over-reads by pediatric cardiologists to students and student athletes. During "Know Your Heart" days, screenings will be held September 9-10 at the St. Lucie West Centennial High School, 1485 Southwest Cashmere Boulevard, Port St. Lucie, Florida. The screenings are open to children and young adults of all ages, including the general public. To register and select a time, call (772) 215-1912. A \$20 reduced rate, to cover administrative costs, will be charged for each test although programs are available for those who can not afford the fee. Event hours are Friday from noon to 5pm and Saturday 9am to 5pm.

"The Jessica Clinton MVP Foundation has done so much to help save the lives of children in Florida. With the 'Know Your Heart' days, we are hoping together to bring better health to children of all ages and help inform students and young athletes about cardiac health," said Maurizio Vecchione, CEO of CompuMed.

CompuMed's telemedicine enhanced ECG screening allows pediatric cardiologists to supplement the computerized interpretation obtained by the ECG machine with their own over-reads. It's often difficult and costly to see a pediatric cardiologist to interpret a test, but all children screened will receive a pediatric cardiologist over-read of their tests in addition to the ECG report.

The Jessica Clinton MVP Foundation was founded in December 2003 by parents Ramon and Cheryl Laloo after losing their daughter Jessica to sudden cardiac arrest while she was cheerleading. The Foundation created in her honor is working to prevent such tragedies.

While ECG tests can not detect all heart abnormalities, the combination of an ECG test with a pediatric cardiologist over-read has been shown effective in identifying some heart ailments. "Our hope is to make an ECG test and an expert pediatric cardiologist over-read available to everyone who wishes to be screened as part of our vision to screen every student for heart defects," said Laloo.

"We'd focused successful efforts in getting defibrillators in all schools in Florida, but we realize it would be fantastic to find the kids with heart problems before they need a defibrillator. With our 'Know Your Heart' days, we are beginning to deliver that vision to the heart of our community," said Laloo.

### **About CompuMed**

CompuMed, Inc. (NASDAQ OTC: CMPD) develops and markets products and services that combine advanced imaging with medical informatics. Its focus is on analysis and remote monitoring for patients with cardiovascular and musculoskeletal diseases. The company has specialized expertise and intellectual property in telemonitoring imaging and analysis designed to improve healthcare provider workflow and patient care while reducing costs. CompuMed is headquartered in Los Angeles and distributes its products worldwide both directly and through OEM partners. Visit CompuMed at [www.compumed.net](http://www.compumed.net) and follow at Twitter: @compumed.

### **The Jessica Clinton MVP Foundation**

The Jessica Clinton MVP Foundation was formed in Dec. 2003, co-founded by Ramon & Cheryl Laloo, after the loss of their daughter Jessica. On Oct. 2nd 2003, while taking a break during cheerleading practice, Jessica went into Sudden Cardiac Arrest. Although CPR was performed, they were unable to resuscitate her. Jessica had numerous sports physicals and was never diagnosed with any heart conditions. It was discovered that Jessica had an undiagnosed heart condition called Mitral Valve Prolapse. Since then The Jessica Clinton MVP Foundation have been working with local school boards to provide A.E.D's to the schools, and develop training programs for their faculty. The Foundation has directly donated over 60 defibrillators to local schools and parks. The Foundation has also participated in the deployment of hundreds of defibrillators in the State of Florida. In addition, the Foundation has provided CPR/AED training for hundreds of faculty members and to the general public. In 2006, in a joint effort with the American Heart Association, the Foundation successfully lobbied to have a bill passed, requiring all High Schools, in the State of Florida, which participate in an athletic program, to have at least one defibrillator on the premises. In 2007 The Foundation received the "Jefferson Award" for public service. The Foundation is committed in taking progressive

steps to reduce the risk of losing our children unnecessarily to Sudden Cardiac Arrest. More info at [www.jessicaclinton.org](http://www.jessicaclinton.org)

## **Forward Looking Statements**

*Statements contained in this report, such as statements about revenue, operations, and earnings growth and other financial results are forward-looking statements pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. All such forward-looking statements including statements concerning the Company's plans, objectives, expectations and intentions are based largely on management's expectations and are subject to and qualified by risks and uncertainties that could cause actual results to differ materially from those expressed or implied by such statements. These statements are subject to uncertainties and risks including, without limitation, product and service demand and acceptance, changes in technology, ability to raise capital, the availability of appropriate acquisition candidates and/or business partnerships, economic conditions, the impact of competition and pricing, capacity and supply constraints or difficulties, government regulation and other risks identified in the Company's filings with the Securities and Exchange Commission and OTC Pink operated by OTC Markets. All such forward-looking statements are expressly qualified by these cautionary statements. The Company expressly disclaims any obligation or undertaking to release publicly any updates or revisions to any forward-looking statements to reflect events, conditions or circumstances on which any such statement is based after the date hereof, except as required by law.*
