

CompuMed to Exhibit at the National Conference on Correctional Health Care

LOS ANGELES – October 17, 2012 -- CompuMed, Inc. (OTCBB: CMPD) (www.compumed.net) -- a leader in telemedicine services for patient diagnosis and management -- will exhibit at the National Conference of the National Commission on Correctional Health Care (NCCHC). CompuMed will be previewing its new telemedicine and telecardiology enterprise solutions. The conference is being held in Las Vegas on October 20-24.

CompuMed provides cardiac telemedicine equipment and services to a wide variety of correctional facilities nationwide. CompuMed's clients include: state departments of corrections, correctional managed care companies, county and city jails, juvenile justice facilities and mental health facilities. Cardiac care is essential in quality prison healthcare and risk management.

"Our cardiac telemedicine service allows prisons to provide quality care even when they are located in a remote setting," said Maurizio Vecchione, CompuMed's CEO. "We help our customers to curtail unnecessary referrals to emergency rooms and costly specialists.

The CardioGram system reduces healthcare costs significantly by providing remote cardiac screening at the point-of-care and reducing unnecessary transports to emergency rooms. However, the most unique and life-saving feature of the CardioGram is the device's over-read capabilities or "The Doctor Inside™," which immediately engages one of CompuMed's on-call cardiologists to over-read the computerized interpretation. Cardiologist over-reads can be made available to attending physicians at the point-of-care providing expert interpretations in those situations where the data is ambiguous or difficult to interpret. "The Doctor Inside" is a key element of CompuMed's unique approach to telemedicine and telecardiology.

CompuMed will be exhibiting at booth #502 during exhibit hours. For more information, contact CompuMed at 310- 258-5000 or sales at (310) 258-5033.

About CompuMed

CompuMed's diagnostic and management tools for the healthcare community focus on telecardiology systems and software solutions.
