## **COMPUMED'S ENTERPRISE TELEMEDICINE SOLUTION NOW INCLUDES GE HEALTHCARE'S VSCAN**

LOS ANGELES, CA (March 5, 2014) - CompuMed, Inc. (OTCPink: CMPD) announced that it is distributing GE Healthcare's Vscan as an integrated part of its Enterprise Telemedicine Solution. Vscan is a handheld, pocket-sized visualization tool that houses ultrasound technology, which strengthens the clinical confidence of physicians and aids in speedy diagnosis. This unique, easy-to-use device provides a non-invasive look inside the body, for immediate visual validation.

CompuMed's Enterprise Telemedicine Solution enables Vscan cardiac, abdomen, and OB/GYN related ultrasound images to be interpreted by its national network of Board-Certified specialists in real time. With Vscan, more accurate information is provided to help speed diagnosis, improve patient management and workflow, and deliver the next level of patient care.

"Clearly the future is now. CompuMed is leveraging Vscan and its national physician network to enable clinicians to have unmatched diagnosis capability at the point of care. Most clinicians strongly believe that they have an obligation to leverage diagnostic solutions that improve patient care. This is clearly one of those solutions," said Dr. David Frisch, Medical Director of CompuMed. Doctor Frisch is an Associate Professor of Clinical Medicine at UCLA's David Geffen School of Medicine, Director of the Center for Heart Attack and Stroke Prevention, and a founding board member and director of the Cedars-Sinai Physicians Association.

"Our Enterprise Telemedicine Solution featuring GE's Vscan is a game changer because diagnosis across multiple clinical areas is delivered in real time through a combination of Vscan and our Board-Certified specialists. We're thrilled to expand our strategic partnership with GE Healthcare by providing our customers unmatched clinical care," said W. Scott Rombach, CompuMed's President and CEO.
